## 690nA, Non-Unity Gain, Quad Rail-to-Rail Input/Output Operational Amplifier

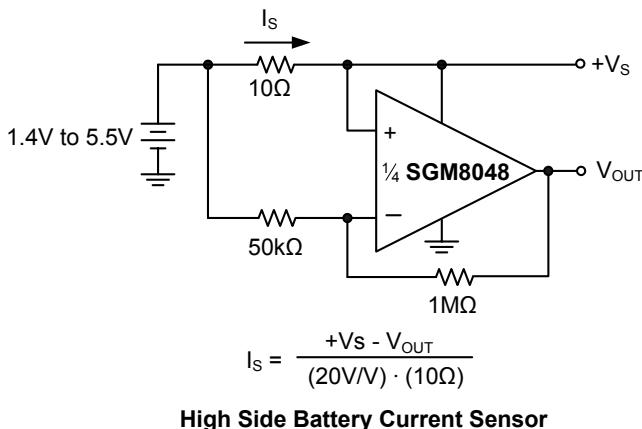

### PRODUCT DESCRIPTION

The SGM8048 operates with a single supply voltage as low as 1.4V, while drawing less than 690nA (TYP) of quiescent current per amplifier. This device is also designed to support rail-to-rail input and output operation. This combination of features supports battery-powered and portable applications.

The SGM8048 has a gain-bandwidth product of 100kHz (TYP) and is stable for gains  $\geq 10$ . The combination of characteristics makes the SGM8048 ideal for low frequency applications, such as battery current monitoring and sensor conditioning.

The SGM8048 operational amplifier is offered in quad configuration and it is specified for the extended industrial (-40°C to +85°C) temperature range. The SGM8048 is available in the Green SOP14, TSSOP14 packages.

### TYPICAL APPLICATION

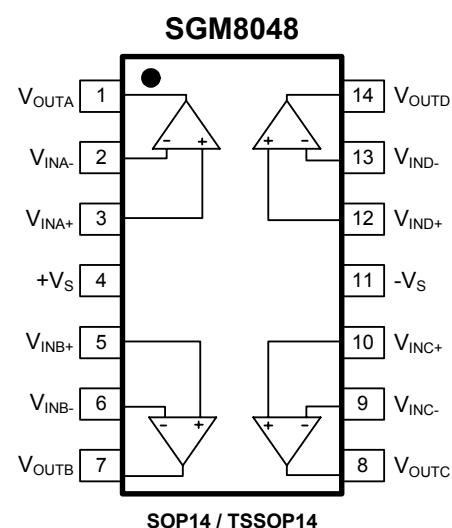

### FEATURES

- Low Quiescent Current: 690nA/Amplifier (TYP)
- Rail-to-Rail Input and Output
- Gain Bandwidth Product: 100kHz (TYP)
- Stable for Gains  $\geq 10$
- Wide Supply Voltage Range: 1.4V to 5.5V
- -40°C to +85°C Operating Temperature Range
- Available in Green SOP14, TSSOP14 Packages

### NOTE:

Stresses above those listed under Absolute Maximum Ratings may cause permanent damage to the device. This is a stress rating only; functional operation of the device at these or any other conditions above those indicated in the operational section of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

## CAUTION

This integrated circuit can be damaged by ESD if you don't pay attention to ESD protection. SGMICRO recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage.

ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because very small parametric changes could cause the device not to meet its published specifications.
