Low Noise, High Precision, High Voltage, Rail-to-Rail I/O Operational Amplifiers

GENERAL DESCRIPTION

The SGM8276-1 (single), SGM8276-2 (dual) and SGM8276-4 (quad) are low noise, high precision, high voltage operational amplifiers that are designed to offer a wide input common mode voltage range and output voltage swing. These devices can operate from $\pm 1.65\text{V}$ to $\pm 18\text{V}$ dual power supplies or from 3.3V to 36V single supply.

The devices feature low noise, high slew rate, low input bias and offset current, low offset voltage and low offset voltage temperature coefficient.

The single SGM8276-1 is available in a Green SOT-23-5 package. The dual SGM8276-2 is available in a Green SOIC-8 package. The quad SGM8276-4 is available in a Green SOIC-14 package. The SGM8276-1/2/4 are specified over the extended -40°C to $+125^{\circ}\text{C}$ temperature range.

RECOMMENDED OPERATING CONDITIONS

Operating Temperature Range-40°C to +125°C

NOTE:

1. Proper power supply sequencing is recommended for the CMOS device. Always sequence V_S on first, followed by the inputs and outputs.

OVERSTRESS CAUTION

Stresses beyond those listed in Absolute Maximum Ratings may cause permanent damage to the device. Exposure to absolute maximum rating conditions for extended periods may affect reliability. Functional operation of the device at any conditions beyond those indicated in the Recommended Operating Conditions section is not implied.

ESD SENSITIVITY CAUTION

This integrated circuit can be damaged by ESD if you don't pay attention to ESD protection. SGMICRO recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage. ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because very small parametric changes could cause the device not to meet its published specifications.

DISCLAIMER

SG Micro Corp reserves the right to make any change in circuit design, or specifications without prior notice.
